Awareness Programme on

"Preparedness for El Niño: Safeguarding Crops, Livestock and Livelihoods"

Date: 22 July 2026

Venue: Jayantipur, Rani, Guwahati

Organized by

ICAR–National Research Centre on Pig (ICAR-NRC on Pig), Rani, Guwahati

Coordinator:	Dr. Seema Rani Pegu	Sr Scientist, ICAR-NRC on Pig
Members:	Dr. Rajib Deb	Sr. Scientist, ICAR-NRC on Pig
	Dr. Meera K	Scientist, ICAR-NRC on Pig

An awareness programme on "Preparedness for El Niño: Safeguarding Crops, Livestock and Livelihoods" was organized on 22 July 2026 at Jayantipur Village, Rani, Guwahati by ICAR–National Research Centre on Pig, Guwahati. The programme aimed to create awareness among farmers and school students about the impacts of El Niño on agriculture, livestock, and rural livelihoods. During the awareness session, participants were educated on climate-resilient farming practices, efficient water management, fodder conservation, livestock health management, heat stress mitigation, and disaster preparedness measures to reduce the adverse effects of climate variability.

As part of the programme, a drawing competition on the theme "Preparedness for El Niño: Safeguarding Crops, Livestock and Livelihoods" was organized for school students. The competition encouraged children to creatively express their understanding of climate change, environmental conservation, sustainable agriculture, and livestock protection, thereby promoting awareness through art.

The programme witnessed the active participation of farmers and students from Jayantipur Village, fostering interaction between the scientific

community and the local community. It concluded with the distribution of prizes and appreciation to the participants, followed by a vote of thanks. Overall, the programme successfully enhanced awareness of climate-resilient agricultural and livestock management practices while encouraging young students to actively engage in environmental awareness through creative expression.

Glimpses of the programme
